MusicWyse

MusicWyse is a music retailer that conducts its business on-line. Customers go to its web site and preview music CDs. If they wish to purchase a CD, customers complete an order form on the web site, submit it with their credit card number then the CD is posted to them or they can download it.

MusicWyse wishes to improve its web site to encourage more people to explore the services it offers and you have been contracted to produce the opening page of the web site for them

You can include images in the page if you wish. In creating the page the following items need to be included:

- 1 A background that includes the following information about the company: The name could be part of a logo.
